Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

RL Patent number WO0121796, 29-MAR-2001.

CC -!- FUNCTION: LIGAND FOR THE T-CELL-SPECIFIC CELL SURFACE RECEPTOR

CC CYTOKINE SECRETION; DUNCES ALSO B-CELL PROLIFERATION AND

CC CYTOKINE SECRETION; DIAGNA CELLS. COULD PLAY AN IMPORTANT ROLE IN

CC CYTOKINE SECRETION; DIAGNA CELLS. COULD PLAY AN IMPORTANT ROLE IN

CC MEDIATING LOCAL TISSUE RESPONSES TO INFLAMMATORY CONDITIONS, AS

CC WELL AS IN MODULATING THE SECONDARY IMMUNE RESPONSE BY CO-

STIMULATING MEMORY T-CELL FUNCTION (BY SIMILARITY).

CC -!- SUBCELLULAR LOCATION: Type I membrane protein (By Similarity).

CC -!- SUBCELLULAR DOCATION: Type I membrane protein (By Similarity).

CC -I- SUBCELLULAR LOCATION: Type I membrane protein (By Similarity).

CC -I- SUBCELLULAR LOCATION: Type I membrane protein (By Similarity).

CC -I- SUBCELLULAR LOCATION: Type I membrane protein (By Similarity).

SUBCELLULAR LOCATION: Type I membrane protein.

SUBCELLULAR LOCATION: Type I membrane protein.

TISSUE SPECIFICITY: EXPRESSED ON ACTIVATED B CELLS.

SIMILARITY: BELONGS TO THE IMMUNOGLOBULIN SUPERFAMILY.

SIMILARITY: CONTAINS 1 IMMUNOGLOBULIN-LIKE C2-TYPE DOMAIN.

SIMILARITY: CONTAINS 1 IMMUNOGLOBULIN-LIKE V-TYPE DOMAIN.

CAUTION: IT IS UNCERTAIN WHETHER MET-1 OR MET-7 IS THE INITIATOR.

-1- FUNCTION: LIGAND FOR THE T-CELL-SPECIFIC CELL SURFACE RECEPTOR

CYTOKINE SECRETION; INDUCES ALSO H-CELL PROLIFERATION AND

DIFFERENTIATION INTO PLASMA CELLS. COULD PLAY AN IMPORTANT ROLE IN

MEDIATING LOCAL TISSUE RESPONSES TO INFLAMMATORY CONDITIONS, AS

WELL AS IN MODULATING THE SECONDARY IMMUNE RESPONSE BY CO-

STIMULATING MEMORY T CELL FUNCTION. DURING PREGNANCY, MAY FUNCTION

STEMPLATING MEMORY TO CELL FUNCTION.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         the European Bioinformatics Institute. "Association of BEN glycoprotein expression with climbing fiber

axonogenesis in the avian cerebellum.";

J. Neurosci. 12:1548-1557(1992).

-I- FUNCTION: HOMOPHILIC ADBRESION MOLECULE ASSOCIATED WITH CLIMBIN

FIBER AXONOGENESIS. SUPPORTS NEURITE EXTENSION.

-I- SUBCELTULAR LOCATION: Type I membrane protein.

-I- TISSUE SPECIFICITY: EXPRESSED IN A RESTRICTED POPULATION OF A)

WITHIN THE SPINAL CORD IT IS LOCALIZED TO AXONS IN THE DORSAL

FUNICULUS, MIDLINE FLOOR PLATE CELLS, AND MOTONEURONS. FOUND

EPITHELIA, CENTRAL NERVOUS SYSTEM, AND HEMOPOIETIC CELLS. EACH

DEVELOPING SYSTEM CARRIES DIFFERENTLY GLYCOSYLATED MOLECULAR!
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Neuron

SUBGULT: SEEMS TO ASSOCIATE WITH XANTHINE DEHYDROGENASE/OXIDASE.

SUBCELLULAR LOCATION: Type I membrane protein.

TISSUE SPECIFICITY: EXPRESSED IN MAMMARY TISSUE AND SECRETED IN ASSOCIATION WITH THE MILK-FAT-CLOBULE MEMBRANE DURING LACTATION.

DEVELOPMENTAL STAGE: EXPRESSION INCREASES DURING THE LAST HALF OF PREGNANCY AND IS MAXIMAL DURING LACTATION.

SIMILARITY: BELONGS TO THE IMMUNOGLOBULIN SUPERFAMILY. BIN/MOGGINEPARTY
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             This SWISS-PROT entry is copyright.
